GEOS 446

Petroleum Geology

3 credits

Hydrocarbons fuel today's economy, but remain a relatively rare natural resource. The objective of this course is to review the geologic controls on the distribution and accumulation of

Topics to be covered will include:

- the subsurface environment
- the origin and nature of hydrocarbons
- · how and where hydrocarbons accumulate
- methods of hydrocarbon exploration and exploitation
- unconventional hydrocarbon resources
- basic reservoir engineering techniques

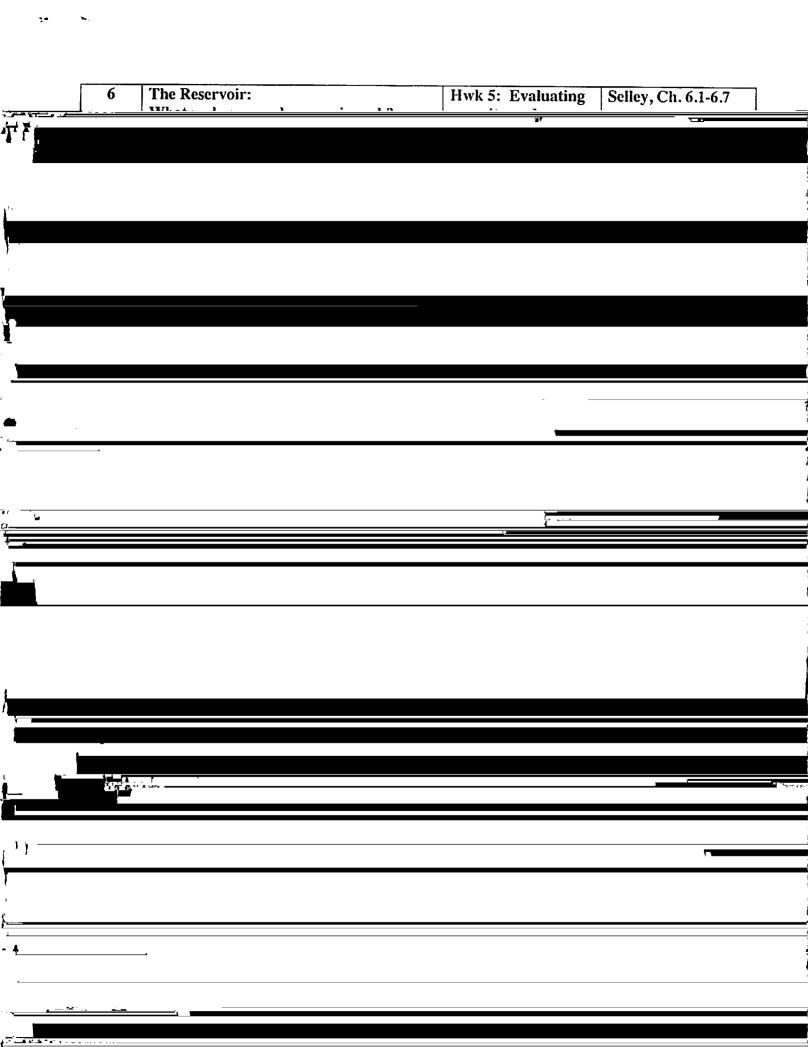

Examples from classic hydrocarbon-producing regions will be used to illustrate the principles and techniques discussed in class.

B = 83-86% B- = 80-82 C+ = 77-79 C = 73 - 76% C- = 70 - 72 D+ = 65-69 D = 55-64% D- = 50 - 54

F = <55%

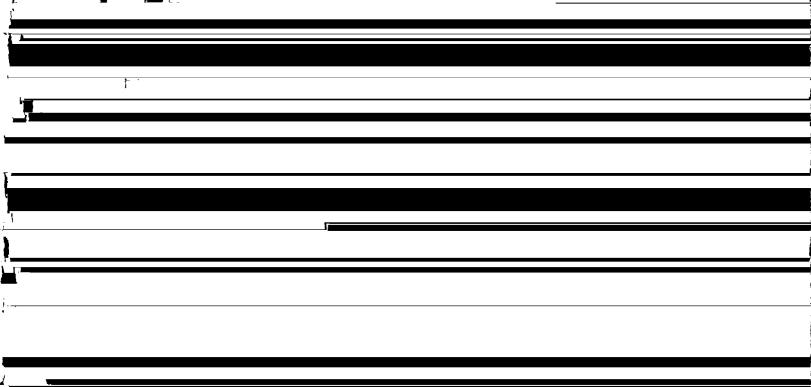

The instructor reserves the right to curve the grades where appropriate.

PETE/GEOS 646

Petroleum Geology

3 credits

Hydrocarbons fuel today's economy, but remain a relatively rare natural resource. The objective of this course is to review the geologic controls on the distribution and accumulation of hydrocarbons, how those hydrocarbons are found, and how they are subsequently extracted. Topics to be covered will include:

- the subsurface environment
- the origin and nature of hydrocarbons
- how and where hydrocarbons accumulate
- methods of hydrocarbon exploration and exploitation
- unconventional hydrocarbon resources
- haringanain graincain a tachnisma

Examples from classic hydrocarbon-producing regions will be used to illustrate the principles and techniques discussed in class.

Students will be assigned additional readings each week that expand on the topics discussed in class. Students will then use the concepts and techniques discussed in both the class and the readings to research a petroleum topic related to their own area of research. Results will be summarized as a paper and presented to the class as a short presentation.

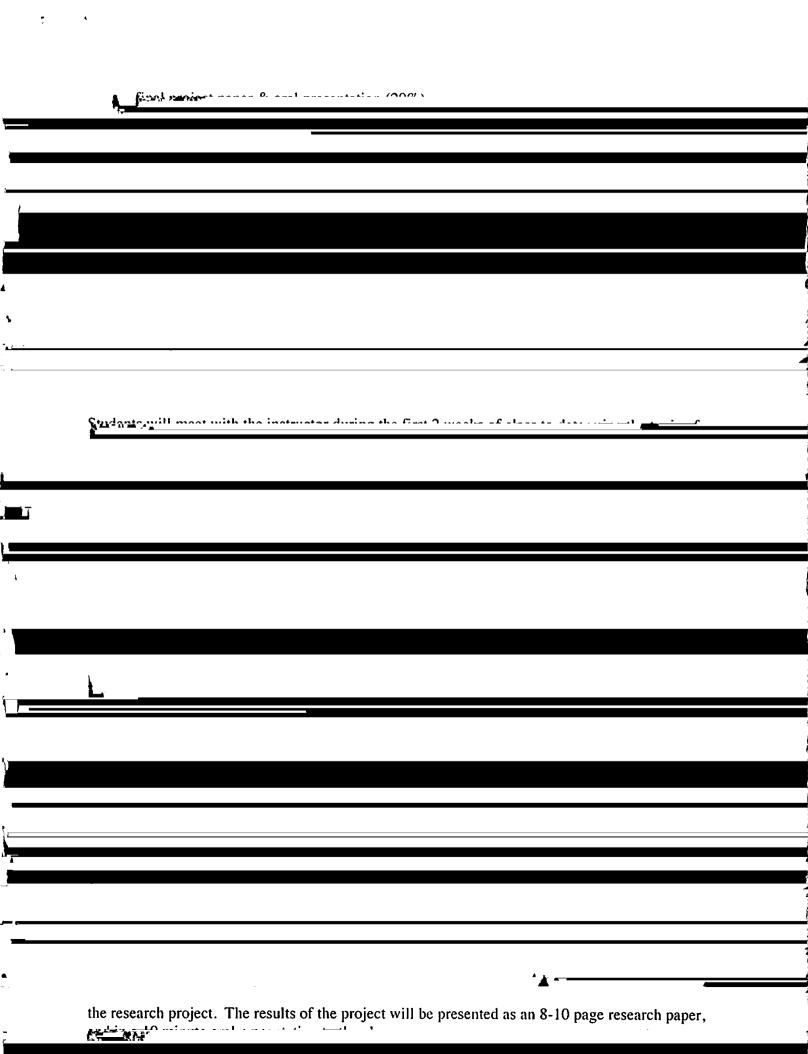

Graduate standing or nermission of the instructor

Instructor: Cathy Hanks, NSB 346/Duckering 417, 474-5562 or 2668

chanks@gi.alaska.edu

Text: Selley, 1999, Elements of Petroleum Geology. Academic Press, 470 p.

Additional readings will be assigned each week to augment the lectures.
