**Trial Course: Natural Hazards** 

and Disasters

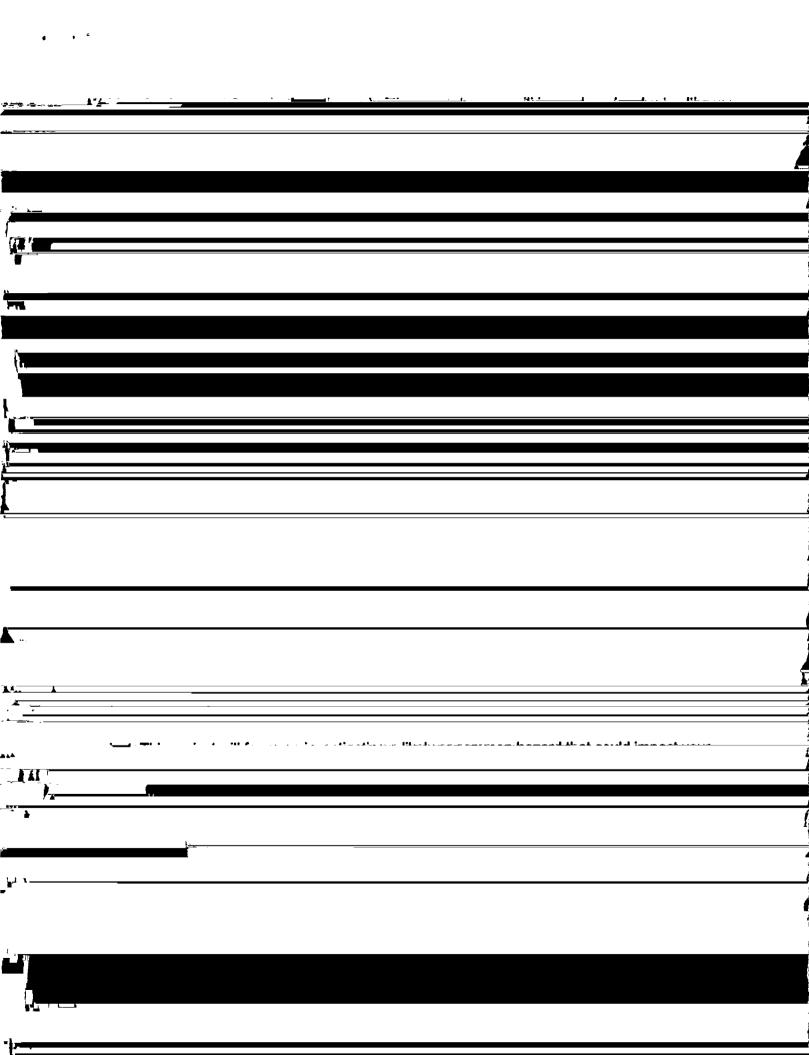

writing, sociology, political science, public policy, emergency management, and business. A primary objective is to give students a working knowledge of the science behind natural hazards, to help them better prepare for their chosen careers.

To meet this goal, the course objectives are: 1) Explore major types of geologic and

climate/weather related hazards, and the geoscience behind their causes. 2) Examine "case studies" that present ways that humans have tried to mitigate disasters associated with different types of hazards. 3) Explore the resulting societal impacts through case studies of recent hazardous events. 4) Apply what is learned in lecture through in-class and associated homework activities.

## LEARNING OUTCOMES State and of the payors would begin to see how associations and citizens in boroadown.

phenomena view the natural and human world. The course will provide avenues to apply what you have learned through class, homework, case study, and writing activities. Upon completion, you will be able to:

## Proposed Lecture Schedule (to be modified as needed)

DATE	LECTURE	HOMEWORK/ACTIVITY	
DAIL	<b>DECTORE</b>	TIONEWORVACIIVIII	ASSIGNMENT
			MODICINITEIN
1/19	Introduction		CH 1
1/24	Plate Tectonics		CH 2
1/26	Earthquakes: Causes		CH3
1/31	Earthquakes: Mitigation		CH4
2/2	In Class activity	Great Earthquakes	
2/7	Tsunamis		CH5
2/9	In class activity	Japan, 2011	
2/14	Volcanoes4 Eruptions		CH 6
2/16	Volcano Hazards →		CH7
	Mitigation		
2/21	In Class activity	Mt. Redoubt, Alaska	
2/23	Landslides		СН в
2/28	Sinkholes/Subsidence		CH 9
3/1	EXAM #1		
3/6	Climate Change		CH 10
3/8	In Class aCtivity	TBD	

The final exam will be given during the scheduled day/time during finals week:

May 7-10
