OIT Follow up report on phone connections - Marthaston

x Phone lines have been removed from classrdogenause each costs \$260 per year. Phones such as Polyconwere brought from individual unitor use in the classroom Reichart, Gruening and Brooks had analog lines that were disconnected. CRCD reconnected four rooms

information.

- Entering information into the Faculty 180 database takes time.

- Another learning process is the geneuradderstanding of using a database vs. word processing docouent.

- Drawback with the software itselfs it has some quirks. Several screenstm be navigated to add date review, and to edit it.

- One frustration heard by the committees that Teachin/Glassinformation entered into the system was not accurate. Michelle said this info is extracted from Bannerand uploaded manually the class is not correct in Faculty 180, then it is because the instructor in Banner is not correct. Accurate information will be more and more important including correct start and end dates, as this is also used for electronic evaluation. Correcting banner records arendong the Dean and Registrar. For Faculty 180 questions or correction Michelle Strickland or AlexFitts.

- A frustration brought up at the faculty senate administrative committee meeting was that there was not a forum for feedback on the system. There are several ways. In addition to contacting Michelle or Alex, other options are to use the link at the Provosts website to submit a google form, use the infaculty 180to contact the compay, or submit a support ticket

- A concern brought forward wave it thesafety of information put into the system. Everything on the internet likely to be hacked at some timecluding this database. Also, the university email is a google system, so that is available to others. Faculty evaluations do not currently go into the life at 80 system but when they do, privacy will be an issue. It has talked about the firewalls in place. - Dean should pull up the information for evaluation at the faculty member has submitted it.

Feedback on use of Zoom and google hangouts

x Overall comments were positive. Audio/visual seemed to work beittle zoom than google hangouts for some. The internet connection for each participant will impact their experience. Having all mute their microphones except for the person speaking seems to help with the issue of echoes.

Items for next months agenda

- Security report- Martha will request the chief security officer address the information on technology safety, here UAFstands on this issue, how many hacking events recently or currently, also include hacking into video conferencing system. Focus on safety of personal information such as is in Faculty 180.

- OIT feedback on videoconferencing - 0 Tc (f)5(o)-8[moxsonalnand
